

Individual and Parent/Carer information

Over the years, we have built up extremely positive and productive relationships with our local community in terms of engagement with local businesses, voluntary organisations and statutory services. At all times we strive to find the best way to further expand our students' horizons and provide a variety of pathways to help develop and get the very best from their bespoke learning and career journeys.

Equally, we are continually amazed at the readiness of individuals and our parents and carers to be willing to share their skills, knowledge, time and resources for the benefit of our students. We are always keen to extend this programme and to develop new and mutually beneficial opportunities and partnerships.

We would welcome an opportunity to chat informally and explore opportunities as to how we can best work alongside each other whilst ultimately benefiting our students.

These could range from mentoring students to talking to small groups about a particular career sector or individual journey. It could also be getting involved in specific events or sharing expertise on aspects of working life in general! There will certainly be other areas that you may have in mind as well.
